

Welcome to the Homepage of the Council for Migration and Integration of the Town of Kandel

Get to know us

Who are we?

- democratically elected women and men
- of many nationalities, including German
- all resident in Kandel, enjoying life in our town and contributing their time and energy to achieve successful integration

What is the role of the Council for Migration and Integration?

We represent the interests of the migrant population and are a point of contact for all issues relating to integration in all aspects of life in Kandel.

We promote positive and constructive interaction between people of different cultures, nationalities and religions in our community.

We take a clear stance against racism, xenophobia, prejudice and discrimination and we work towards finding universally acceptable solutions.

Our goal is to involve the whole community in the integration process.

We liaise with local authority offices, provide assistance with submitting applications and offer advice and support whenever difficulties arise.

We are involved in the organization and promotion of events (e.g. festivals, concerts, lectures etc.) where all members of the community can meet and get to know each other better, thereby overcoming prejudices and building strong community spirit in Kandel.

We link various institutions in the town relevant to integration with integration-related initiatives, to ensure that all issues relating to migration and integration are catered for to the greatest possible extent.

By combining tried-and-tested integration concepts with new approaches, we aim to uncover and harness the innovative potential of migration and life in a multicultural community.

All this work is done by voluntary members of the Council!
